Chesterfield School has always taken steps to continue improving the health and safety of the school community by integrating Certified Green Cleaning Products and EPA Registered Disinfectants. On a regular basis we ensure that all touch points are part of our normal cleaning routine along with and not limited to, cafeteria tables, restroom fixtures, door handles, and stairwell banisters. We encourage our teachers to remind the students to wash their hands and use the Sanitizer that we have provided throughout the school.

As we have always done in past years, during the winter months and the heightened flu season, our custodial staff will complete extra cleaning, disinfecting, and sanitizing of school property.

Chesterfield Elementary School strives to build a premier institution of learning where students are challenged to their fullest potential in a safe and caring environment.
