

Expanding In-Person Learning Plan

Chesterfield Elementary School
March 17, 2021

TIME TABLE

Week of March 8th

- Review survey data
- Based on survey data, identify plan for each grade level
- Share planning with staff Restart and Recovery Committee

Week of March 15th

- Based on grade level plans, finalize individual student placements
- Identify changes in staffing and notify teachers
- Identify changes in use of facility
- Notify NB of transportation changes

TIME TABLE CONTINUED

Week of March 22nd

- Confirm student placements
- Prepare new classroom spaces (library, computer labs, instrumental room, music room, WL room)
- Revise arrival and dismissal procedures

Week of March 29th

- Complete all final preparations

Week of April 12th

- Notify parents of arrival and dismissal changes
- Notify parents of transportation changes

Monday, April 19th - Begin Expanded In-Person Learning

KEY COMPONENTS OF PLAN

- Maintain all current health and safety protocols including 6 feet social distancing and the mask requirement.
- Adjustments in arrival and dismissal procedures to accommodate the increase in students each day.
- Maintaining current early dismissal schedule with virtual small groups and specials in the afternoon.
- Avoiding the week after Spring Recess for our start date due to staff and student travel and the possibility of quarantining.

CHALLENGES

- Transportation - availability of additional routes
- Student Placements - once placements are finalized, these will be the placement of students for the remainder of the school year. Due to the need to work within all current health and safety guidelines, students will not be permitted to change their placement to any in-person instructional model.

CURRENT STATUS

- We are following our time table as presented earlier.
- We will not release any information until the plan is complete due to the fact that there are so many factors that must align.
- We look forward to bringing back as many students as we can for the remainder of the school year and following all current health and safety guidelines.
