

Tips for Remote Learning

Set up as consistent a **ROUTINE** as possible - this is challenging in these times, but routines are helpful. What time works for your family? When does your child learn best?

Designate a **WORK AREA** - have supplies available.

Create a **PLAN** - this will help students organize and adapt to this new routine. You will probably need to modify the schedule as we move through the process.

Minimize **DISTRACTIONS** - Eliminate distractions from phones, TV, etc...

Take **BREAKS** - younger students and children with difficulty focusing may require more frequent breaks.

DON'T STRUGGLE - Please reach out to your child's homeroom teacher or other teachers (Basic Skills, ESL, or Resource Teachers) for help. Let them know how your child is doing and ask for suggestions.
